

FIXATIVE

# ANTIBACTERIAL

FISS.ANTIBA

## PRODUCT DESCRIPTION

Naturalcalk Fissativo Antibatterico is a ready-to-use liquid product, to be shaken and diluted with water before use, and can be used as an adhesive, by brush or spray. Ideal for the preparation, consolidation, or improvement of the grip of the substrate for all subsequent treatments with Naturalcalk lime-based products, for dusting walls and fruble surfaces; in particular, it prepares the surface for the subsequent application of Tillica Pasta and Tillica Tinta, thus improving their grip.

## FIELDS OF USE AND PRODUCT APPLICATION

Naturalcalk Fissativo Antibatterico is also applied on the regularizing layers that are made in the presence of disconnected and particularly damaged walls, to prepare them to receive the subsequent works. To apply the product correctly, it is recommended to shake and dilute it before use, with a brush or spray and dilute with water at 30-40%.

## PRODUCT FEATURES AND BENEFITS

Consisting of Naturalcalk Grassello di Calce naturally seasoned and aged for a long time in tanks, produced by cooking limestone mixtures, according to UNI EN 459-1 standards, and natural resins. We recommend installing all subsequent works on Naturalcalk Fissativo Antibatterico not yet perfectly dry or on walls still wet and damp unless otherwise specified.

Why should you choose Naturalcalk Fissativo Antibatterico?

- Yield 7-10 sqm/L depending on the surface.
- Specific weight 1.2 kg/L.
- Fire reaction class A1.
- Power of adhesion 16kg/square centimeter.
- Good tear resistance.
- Unlimited duration and expiry if stored correctly.

## WARNINGS

The application of the finishes on the Naturalcalk Fissativo Antibatterico must be done "fresh on fresh," i.e., on the wall that is not yet perfectly dry (still wet and damp), unless otherwise indicated.

Do not apply with temperatures of the atmosphere or of the substrate below 4°C or higher than +30°C; be careful to use in excessively ventilated environments or those at risk of quick drying and protect from strong temperature changes.

It is recommended to clean the surfaces from oils, dust, and any sludge or crusts that could be detached. It is a slow-setting product not to be used for work in the presence of water. The exclusive use of the products of the Natural Calk line is absolutely strict in every processing phase of the Tillica Pasta system in order to maintain the characteristics of the system and guarantee the result.

The company takes on solely responsibility for the product up to the departure of the material from the deposit/supplier Arte e Mestieri SRL, while the application, use, and processing are the exclusive responsibility of the customer or the applicator.

The company reserves the right to modify the composition, keeping the characteristics naturally unchanged.
